

Top 10 Ways To Break Your Deployments

Or: How to Avoid Your Sorry Fate

Dev Nambi
Senior Software Engineer
Microsoft

It Works On My Machine

10. Ignore User Activity
9. Don't Migrate Data
8. Ignore Time to Release
7. Ignore Security and Permissions
6. Make Code Environment Specific

It's "Just" a Deployment Script

5. Complexity = Good. Add more!
4. Scripts don't need to be re-run
3. Rollbacks? We don't need no stinkin' rollbacks!

Trust and Communication

2. Don't Test Your Releases
1. DBAs and Developers Don't Talk to Each Other

Complete the Evaluation Form to Win!

Win a Dell Mini Netbook – every day – just for handing in your completed form. Each session evaluation form represents a chance to win.

Pick up your evaluation form:

- In each presentation room
- Online on the PASS Summit website

Drop off your completed form:

- Near the exit of each presentation room
- At the Registration desk
- Online on the PASS Summit website
